## Preface

Julie L. Gerberding, M.D., M.P.H.  
Director, CDC

Each year, the Centers for Disease Control and Prevention (CDC) works diligently with its partners throughout the United States to promote health and quality of life by preventing and controlling disease, injury, and disability nationally and internationally.

Since 1987, CDC has highlighted its partnerships with state and local health departments and other public and private agencies through the annual *State Health Profiles*. Public health officials and policymakers have used these profiles, which include all 50 states and the District of Columbia (DC), as a snapshot of the nation's health. They have also used them to monitor how federal funds and programs aimed at improving the nation's health are being applied at state and local levels.

In 2002, the *Profiles* changed in two key ways. First, the 51 volumes were streamlined into one publication that offered easy comparisons among all states and DC, and second, the publication was made available on CDC's website.

The 2003 *Profiles* again focus on key information regarding the nation's overall health status, distribution of federal health-care expenditures and services, and CDC's partnerships with the 50 states and DC. CDC's collaborative efforts with partners at the federal, state, and local levels have lead to major public health achievements during the past 50 years, including record low rates for vaccine-preventable diseases, decreases in infant mortality rates, control of infectious diseases, and declines in heart disease and deaths caused by strokes.

By providing meaningful public health information to policymakers and the public through the annual *State Health Profiles*, we strive to continue our efforts to improve the nation's health. We hope you find this publication useful.

Julie Louise Gerberding, M.D., M.P.H.  
Director, CDC

## Health Indicators

Access to Health Care

Acquired Immunodeficiency Syndrome

Cancer Prevention

Cardiovascular Disease Deaths

Diabetes Control

Environmental Quality

Foodborne Pathogens

Infant Health

Injury and Violence

Mortality

Occupational Safety and Health

Overweight and Obesity

Physical Activity

Respiratory Disease

Responsible Sexual Behavior

Smoking

Substance Abuse

Vaccination Coverage

## **CDC's Public Health Partnerships by State and CDC Funds for States**

CDC works with state and local health departments, educational institutions, and other private and public organizations to implement CDC's mission of promoting health and quality of life by preventing and controlling disease, injury, and disability. The programs and projects on the following pages are examples of CDC's partnerships throughout the United States during 2003.

# Sample Services Provided by CDC Throughout the United States

## Investigations and Emergency Response

---

- Responded to national and international emergencies, including natural disasters (e.g., hurricanes and earthquakes) and displaced populations. **EPO**
- Provided a secure, Internet-based communications network (*Epi-X*) for state health officers and other key public health officials to exchange critical information related to emergent health events across multiple jurisdictions. **EPO**
- Conducted investigations of suspected clusters of birth defects, developmental disabilities, or health problems related to persons with disabilities. **NCBDDD**
- Maintained databases regarding prevalence of birth defects and specific developmental disabilities to quickly locate answers to such questions as, “Are allergy medications associated with an increase in birth defects?” or “Does a certain antibiotic pose a threat to the developing fetus if administered to a pregnant woman who might have been exposed to anthrax?” **NCBDDD**
- Developed strategies, guidelines, and communication materials for hospitals, emergency responders, and other health officials to use in responding to national and international emergencies, including terrorism, natural disasters, and care of refugee populations. **NCEH**
- Provided state and local health departments in 14 states with technical assistance in response to reports of rashes among school children. **NCEH**
- Deployed Syphilis Elimination Rapid Response Teams to assist local areas in controlling increases in syphilis; also conducted ethnographic research at sites experiencing increases in sexually transmitted diseases (STDs) to identify barriers to prevention and strategies to overcome those barriers. **NCHSTP**
- Investigated outbreaks of infectious diseases and clusters of other public health problems. **NCID**
- Assisted states with investigations of suspected terrorist events. **NCID**
- Provided funds to Columbia University’s Mailman School of Public Health for identifying individual, organizational, behavioral, social, and structural factors associated with the evacuation of the World Trade Center Towers 1 and 2 after the terrorist attack on September 11, 2001, and to compare data associated with the 1993 and 2001 World Trade Center evacuations. **NCIPC**
- Funded the New York Department of Health for review of medical records of persons hospitalized with trauma after the World Trade Center attack on September 11, 2001, and to identify patients who experienced a traumatic brain injury (TBI) that might not have been diagnosed initially; facilitated a meeting of emergency/disaster response and TBI specialists to discuss ways to identify persons who might have experienced a TBI and to assist those persons with needed services. **NCIPC**
- Conducted field investigations of possible health hazards in the workplace in response to employee, employer, or government agency requests. **NIOSH**
- Improved disease and vaccination surveillance by supporting systems that monitor disease trends, assess vaccine coverage, and monitor adverse events. **NIP**
- Developed a communications system to alert state health departments of possible terrorism attacks and other health threats; the system can now reach 1 million recipients nationwide within 3 minutes. **PHPPO**

## Training

---

- Provided training curricula and other services to health-care providers in such areas as diagnosis, treatment, and prevention of fetal alcohol syndrome; also provided educational materials to health-care providers regarding prevention of birth defects (i.e., folic acid for prevention of spina bifida) and prevention of secondary conditions among persons living with disabilities. **NCBDDD**
- Provided training, technical assistance, and consultation for *Diabetes Today*, a community-based planning, implementation, and evaluation tool for diabetes control and prevention for state health departments and their partners; training is provided for both English- and Spanish-speaking populations. **NCCDPHP**
- Implemented a series of regionalized forums for decision makers to use in planning and preparing comprehensive cancer-control efforts in their states; these leadership institutes, Working Together for Comprehensive Cancer Control: An Institute for State Leaders, were held in collaboration with key national organizations. **NCCDPHP**
- Provided states with asthma training materials, monthly teleconferences, and a national asthma training curriculum to assist health departments in establishing a state-level asthma program. **NCEH**
- Funded a national program to train federal, state, and local government officials regarding elimination of childhood lead poisoning through improved primary prevention, screening procedures, clinical case management, outreach and education efforts, and environmental hazard abatement, assessment, and control. **NCEH**
- Offered train-the-trainer curricula to all states for human immunodeficiency virus (HIV) prevention. **NCHSTP**
- Provided leadership training in HIV prevention for program managers through a cooperative agreement with the Association of Schools of Public Health. **NCHSTP**
- Assisted states in strengthening their public health practice through laboratory, epidemiology, and communications training. **NCID**
- Provided training for state and local partners in terrorism-related laboratory capacity, preparedness planning, emergency response, surveillance, and information technology. **NCID**
- Provided funds to the University of South Carolina Research Foundation, the University of Miami, Northwestern University, and the University of New Mexico for dissertation awards for doctoral candidates to support violence-related injury prevention research in minority-populated communities. **NCIPC**
- Provided immunization training and education, including continuing education credits, to states through onsite courses, satellite broadcasts, and remote audio, video, and Internet broadcasts. **NIP**
- Promoted improved immunization practices and provided immunization resources by exhibiting at national, regional, and state meetings. **NIP**
- Helped states strengthen their public health practice through laboratory, epidemiology, and communications training and provided training for state and local partners in terrorism laboratory capacity, preparedness planning, emergency response, surveillance, and information technology. **PHPPO**

## Health Information and Guidelines

---

- Published the *Morbidity and Mortality Weekly Report, Recommendations and Reports*, and *Surveillance Summaries* (available at <http://www.cdc.gov/mmwr>). **EPO**
- Provided materials related to early hearing detection and for identifying the prevalence, causes, risk factors, and prevention of birth defects, developmental disabilities, and secondary conditions associated with living with disabilities; conducted educational campaigns for preventing fetal alcohol syndrome and using folic acid to prevent spina bifida. **NCBDDD**
- Published the *School Health Index for Physical Activity, Healthy Eating, and a Tobacco-Free Lifestyle: A Self-Assessment and Planning Guide*, to assist schools in improving their physical activity, nutrition, and tobacco-prevention policies and programs. **NCCDPHP**
- Provided anti-tobacco materials for television, radio, theater, print, outdoor advertisements, and public service announcements and technical assistance with media planning to states and nonprofit organizations nationwide through the Media Campaign Resource Center for Tobacco Control. **NCCDPHP**
- Created a website (<http://www.cdc.gov/ncch/cluster>) for cancer-cluster information for the public, including the results of the Churchill County, Nevada, childhood leukemia investigation. **NCEH**
- Published guidelines for cruise ship operations (*CDC Vessel Sanitation Program Operations Manual*) and cruise ship construction (*Recommended Shipbuilding Construction Guidelines for Vessels Destined to Call On U.S. Ports*). **NCEH**
- Distributed educational materials, grant guidelines, and other resources to health departments and community-based organizations for prevention of sexually transmitted diseases, HIV and acquired immunodeficiency syndrome (AIDS), and tuberculosis (TB). **NCHSTP**
- Published the *2002 Guidelines for the Treatment of Sexually Transmitted Diseases*, to assist health-care providers in protecting their patients from the health consequences that can result from STDs; also published *Screening Tests To Detect Chlamydia trachomatis and Neisseria gonorrhoeae Infections — 2002* (MMWR 2002;51[No. RR-15]), which describes licensed tests, criteria for test selection, test performance, attributes, costs, and ease of specimen collection. **NCHSTP** and **EPO**
- Provided training and guidance to state and local health departments, including public health laboratories, for developing comprehensive terrorism preparedness and response programs. **NCID**
- Published health information for international travelers (available at <http://www.cdc.gov/travel>). **NCID**
- Developed *Sexual Violence Surveillance: Uniform Definitions and Recommended Data Elements*, (Version 1.0) (available at <http://www.cdc.gov/ncipc/pub-res/pubs.htm>) to promote consistency in terminology and data collection related to sexual violence; these recommendations represent a crucial step towards standardizing definitions and data elements for sexual violence surveillance. **NCIPC**
- Published an update to the *Guidelines for the Surveillance of Central Nervous System Injury*, which previously established standards for collecting data related to TBI and spinal cord injury; the updated guidelines incorporated improved methods for TBI surveillance. **NCIPC**
- Developed recommendations and guidelines for creating healthy workplaces. **NIOSH**
- Provided vaccine and immunization materials, designed for parents and interested others, that explain facts regarding childhood vaccines in easy-to-understand language and concepts; one slide series, “The ABCs of Childhood Vaccines,” is available at <http://www.cdc.gov/nip/vaccine/ABCs/default.htm>. **NIP**

- Provided rapid communication regarding immunization topics through the Partners Communication Program, including the *Immunization Works* newsletter (available at <http://www.cdc.gov/nip/news/newsletters/imwrks/imwrks.htm>) and the ImmuEd electronic listserv. **NIP**
- Provided training and guidance to state and local health departments, including public health laboratories, for developing comprehensive terrorism preparedness and response programs. **PHPPO**

### Technical Assistance and Funding

---

- Assigned Public Health Advisors, Prevention Specialists, Epidemic Intelligence Service Officers, Preventive Medicine Residents, and Career Field Officers to state and local health departments. **EPO**
- Provided technical assistance and funding to states to enable collecting data regarding birth defects, autism, early hearing detection and intervention, and to implement programs for improving the health and wellness of persons living with disabilities. **NCBDDD**
- Provided funds and technical assistance for the Pregnancy Risk Assessment Monitoring System (PRAMS), a surveillance system for monitoring selected maternal behaviors and experiences before, during, and after pregnancy. **NCCDPHP**
- Provided technical assistance in conducting youth and adult tobacco-use surveys to monitor behaviors and performance indicators for tobacco-related prevention and control program development, implementation, and evaluation. **NCCDPHP**
- Provided proficiency-testing services and dried blood-spot quality control materials for monitoring and quality assurance of newborn screening program operations. **NCEH**
- Implemented a national program to assist states in building their capacity to collect, integrate, analyze, interpret, and disseminate data related to environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided funds and technical assistance through cooperative agreements to all states and certain cities for TB screening, prevention, and treatment services. **NCHSTP**
- Provided technical assistance for prevention of injection-drug use to all states through a task order with the Academy for Educational Development. **NCHSTP**
- Provided financial and technical assistance to all 50 states, six local health departments, and the Commonwealth of Puerto Rico through the Epidemiology and Laboratory Capacity Program for infectious disease surveillance and response. **NCID**
- Administered the Bioterrorism Preparedness and Response Cooperative Agreement. **NCID**
- Provided funds to all 50 states for a nationwide rape-prevention and education program to increase awareness, and help prevent, sexual assault. **NCIPC**
- Ensured effective immunization services by 1) offering programmatic, technical, epidemiologic, and scientific assistance to state and local areas; 2) awarding grants to states and large local health departments; and 3) providing funding and technical assistance to state immunization programs for immunization registries. **NIP**
- Provided technical assistance and consultation to state and local health departments to improve effectiveness through the National Public Health Performance Standards Program. **PHPPO**
- Provided technical assistance and funds for developing new electronic information tools to improve public health services. **PHPPO**

## CDC's Public Health Partnership with Alabama

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Supported Alabama in development and evaluation of a community project to encourage participation in an arthritis self-help course. **NCCDPHP**
- Funded implementation of the state's tobacco-use prevention and control program. **NCCDPHP**
- Funded community hospitals, health networks, and universities for asthma education and personalized asthma-control plans for innercity families. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Alabama's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Instituted an anthrax vaccine research program at the University of Alabama; the study is examining the safety and efficacy of the anthrax vaccine and includes 300 volunteers. **NCID**
- Funded an injury control research center at the University of Alabama for exploration of health-care concerns regarding injury prevention, acute care, and rehabilitation. **NCIPC**
- Funded a national academic center of excellence on youth violence at the University of Alabama to address this critical public health problem. **NCIPC**
- Supported an evaluation of the effectiveness of a national farm-safety day-camp program for teaching children safer methods of play and age-appropriate work on farms and ranches. **NIOSH**
- Investigated the death of a female volunteer fire fighter and the nonfatal injuries of two other fire fighters who were responding to a fire when the engine in which they were riding overturned. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Alabama in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Alabama at Birmingham to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPO**

## CDC's Public Health Partnership with Alaska

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded development of a system to identify children with fetal alcohol syndrome (FAS) that uses multiple sources to provide more accurate prevalence data; funds for case management and health-care provider education were included also. **NCBDDD**
- Funded projects for building public health capacity and infrastructure to support program leadership, monitoring of oral diseases and risk factors, development of oral health plans and coalitions, and development and evaluation of prevention programs. **NCCDPHP**
- Supported the Alaska Native Cardiovascular Disease Prevention/Core Capacity Building Project that provides culturally informed and data-driven health promotion for reducing disparities in cardiovascular disease outcomes. **NCCDPHP**
- Funded Alaska's public health laboratory to build capacity for conducting a state biomonitoring program. **NCEH**
- Provided funds and technical assistance to the Alaska Department of Health to build environmental health-response capacity in Arctic communities. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided support for infectious disease prevention and control research studies through the Arctic Investigations Program facility located on the Alaska Native Health Campus in Anchorage; approximately 35 staff work at the facility. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Alaska's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the Alaska Department of Health for development of a traumatic brain injury surveillance program. **NCIPC**
- Funded the Alaska Department of Health and Social Services for prevention of fire-related injuries by increasing use of residential smoke alarms. **NCIPC**
- Funded the Alaska Department of Health and Social Services for development and implementation of a surveillance system for occupational injuries, illnesses, and hazards in the seafood and fish-processing industries. **NIOSH**
- Investigated the death of a construction worker, aged 14 years, who was crushed under a 5-ton beam being used to lift and support a building. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Alaska in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Arizona

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded development of a system to identify children with fetal alcohol syndrome (FAS) that uses multiple sources to provide more accurate prevalence data; funds for case management and health-care provider education were included also. **NCBDDD**
- Provided funds and program development consultation to operate Arizona's diabetes prevention and control program, which works to improve the quality of diabetes care and prevent or delay serious diabetes-related complications. **NCCDPHP**
- Provided funding, technical assistance, standards for data collection and use, training, and support for computerized reporting and data-processing systems to improve the completeness, timeliness, and quality of cancer registry data. **NCCDPHP**
- Funded Arizona's public health laboratory as part of the six-state Rocky Mountain Consortium, which also includes Colorado, Montana, New Mexico, Utah, and Wyoming, to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded community hospitals, health networks, and universities for asthma education and personalized asthma-control plans for innercity families. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Arizona's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided technical assistance to state and local health authorities for special-event emergency department surveillance before, during, and immediately after the 2001 World Series. **NCID**
- Provided funding to the Arizona Department of Health Services for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the Arizona Department of Health Services to address the problems of intimate partner and sexual violence among minority youths and to encourage healthy relationships between them and their parents. **NCIPC**
- Funded the University of Arizona for a study of digital technology used to characterize discontinuities in rock masses that can cause ground failures; these ground failures cause approximately half of all mine fatalities and 16% of mine injuries in underground mines, as well as fatal and nonfatal injuries in open-pit mines. **NIOSH**
- Funded researchers at Arizona State University for assessment of whether preassembling structural components of roofs results in reduced costs and lost-work-time injuries from falls, compared with traditional roof construction. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Provided funding and resources for the Southwest Public Health Leadership Institute at the University of Arizona to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Arkansas

- Funded Arkansas' Center for Birth Defects Research and Prevention for participation in a collaborative study of causes of 30 birth defects; Arkansas' center contributes data regarding 300 cases and 100 controls annually and conducts regional birth-defects research. **NCBDDD**
- Funded programs in Arkansas to collect and analyze information concerning prevalence of autism and related developmental disabilities. **NCBDDD**
- Funded efforts to increase public awareness regarding high blood pressure and the signs and symptoms of heart attack and stroke. **NCCDPHP**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Funded Arkansas' public health laboratory to build capacity for conducting a state biomonitoring program. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Assisted state and local health authorities in an investigation of brucellosis associated with consumption of unpasteurized fresh cheese products among Hispanic communities in Arkansas. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Arkansas' terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funding to the Arkansas Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the Arkansas Department of Health to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Arkansas in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Worked with state and local officials in assessing and improving the capacity of public health systems and governing bodies to meet the National Public Health Performance Standards for delivering essential health services. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with California

- Funded California's Center for Birth Defects Research and Prevention for participation in a collaborative study of causes of 30 birth defects; California's center contributes data regarding 300 cases and 100 controls annually and conducts regional birth-defects research. **NCBDDD**
- Funded fetal alcohol syndrome (FAS) regional training centers for development and dissemination of curricula for medical and allied health students and practitioners; the curricula incorporate evidence-based diagnostic guidelines for FAS and other prenatal alcohol-related disorders. **NCBDDD**
- Provided funding, technical assistance, standards for data collection and use, training, and support for computerized reporting and data-processing systems to improve the completeness, timeliness, and quality of cancer registry data. **NCCDPHP**
- Provided funding and technical assistance for planning statewide nutrition and physical activity interventions and conducting demonstration interventions through population-based strategies (e.g., making policy-level changes and social marketing). **NCCDPHP**
- Provided technical assistance, training, and proficiency testing regarding methods used to measure chemical terrorism agents in laboratory samples taken from humans. **NCEH**
- Funded development of the Environmental Health Specialists Network, a network of environmental health specialists who work with epidemiologists and laboratorians to collect data regarding food-handling practices and how those practices relate to foodborne illnesses. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided continuation funding for a cooperative agreement with the University of California at Davis for a study of prevention of infections and complications caused by venous port administration of factor concentrate in hemophilia treatment. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving California's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the Southern California Injury Prevention Research Center in Los Angeles and the San Francisco Injury Center for Research and Prevention for exploration of health-care concerns regarding injury prevention, acute care, and rehabilitation. **NCIPC**
- Funded the University of California at San Diego and the University of California at Riverside for establishment of national academic centers of excellence on youth violence. **NCIPC**
- Supported a study of the relation between adverse male reproductive effects and workplace exposure to boron-containing compounds (e.g., boric acid) to determine if adverse effects occur at lower doses than for other known reproductive toxicants. **NIOSH**
- Funded the Western Agricultural Health and Safety Center at Davis in support of projects to address health and safety concerns faced by farmers in Western agriculture (e.g., respiratory disease in dry-climate farming or neurotoxicity of pesticide exposure). **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Provided financial support for enhancing surveillance for pertussis to better document disease burden and conduct epidemiologic studies. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of California at Berkeley and the University of California at Los Angeles to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Colorado

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded development of a system to identify children with fetal alcohol syndrome (FAS) that uses multiple sources to provide more accurate prevalence data; funds for case management and health-care provider education were included also. **NCBDDD**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Provided funding and technical assistance for planning statewide nutrition and physical activity interventions and conducting demonstration interventions through population-based strategies (e.g., making policy-level changes and social marketing). **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded communities for identifying and addressing environmental health problems by using the Protocol for Assessing Community Excellence in Environmental Health tool. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided continuation funding for a cooperative agreement for the second phase of a study of joint-disease prevention among persons with hemophilia. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Colorado's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded an injury control center at Colorado State University for conducting research regarding prevention and control of rural injuries. **NCIPC**
- Funded the Colorado Department of Public Health and Environment for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Supported research concerning the relation between fatigue and fatal and nonfatal injuries among adolescents working on farms. **NIOSH**
- Funded researchers at Colorado State University for development of a biological model for predicting the cancer potential of exposure to chemical mixtures that cannot be assessed by using conventional experimentation. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Colorado in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Provided funding and worked with the Regional Institute for Health and Environment at the University of Denver to develop managerial and leadership competencies of public health officials and others whose work intersects that of public health. **PHPPPO**
- Funded the Advanced Practice Center for Public Health Preparedness in the Denver Public Health Department as part of the Health Alert Network to focus on operational readiness, communications/information technology, and training applications. **PHPPPO**

## CDC's Public Health Partnership with Connecticut

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded Connecticut's education agency in support of human immunodeficiency virus (HIV) prevention education for youth and to implement the Youth Risk Behavior Survey. **NCCDPHP**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Funded Connecticut's public health laboratory to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded planning and implementation of environmental public health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial support for external research at Yale University to conduct population-based surveillance to determine the burden of diarrheal illnesses caused by pathogens normally undetected by routine laboratory tests. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Connecticut's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funds to the Connecticut Department of Public Health to plan prevention and intervention activities regarding violence against women. **NCIPC**
- Funded Yale University for evaluation of the effectiveness of an integrated intervention program to prevent isocyanate asthma, the most common occupational asthma, among auto body workers. **NIOSH**
- Supported research to better understand the relation between occupational exposure to organic solvents and hearing loss to develop effective interventions. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Connecticut in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Worked with state and local officials in assessing and improving the capacity of public health systems and governing bodies to meet National Public Health Performance Standards for delivering essential health services. **PHPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPO**

## CDC's Public Health Partnership with Delaware

- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Provided funds and program development consultation to operate Delaware's diabetes prevention and control program, which works to improve the quality of diabetes care and prevent or delay serious diabetes-related complications. **NCCDPHP**
- Provided funding, technical assistance, standards for data collection and use, training, and support for establishment of a computerized reporting and data-processing system to improve the completeness, timeliness, and quality of cancer registry data. **NCCDPHP**
- Provided Delaware's Department of Health with funds and technical assistance for *Pfisteria*-related illness surveillance and prevention. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Delaware's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Awarded funds to Delaware's Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Provided funding to Delaware's Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funding to the Delaware Coalition Against Domestic Violence to develop and implement prevention activities that can be integrated into coordinated community responses or similar community-based collaborations. **NCIPC**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Delaware in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with District of Columbia

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded the National Rehabilitation Hospital program to improve understanding of unique health conditions of persons with disabilities to identify health risks and protective factors, and to measure health promotion activity effectiveness for preventing adverse conditions related to living with a disability. **NCBDDD**
- Provided funds and program development consultation to operate the District of Columbia diabetes prevention and control program, which works to improve the quality of diabetes care and prevent or delay serious diabetes-related complications. **NCCDPHP**
- Funded implementation of the tobacco-use prevention and control program. **NCCDPHP**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Through the Association of Schools of Public Health, funded George Washington University's study that examined the prevalence of cancer among Gulf War veterans. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided a field assignee for TB-elimination program assistance, resulting in better services for patients. **NCHSTP**
- Investigated an outbreak of *Salmonella* Muenchen among attendees of a national conference held at a hotel in Washington, DC; probable cases were identified from 17 states. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving the District of Columbia's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funds to the District of Columbia Department of Public Health to plan prevention and intervention activities regarding violence against women. **NCIPC**
- Funded the Georgetown University Medical Center for violence-related injury-prevention research. **NCIPC**
- Funded a study to assess the effectiveness of different air-cleaning and disinfecting interventions in classrooms to reduce asthma and respiratory infections among school children and teachers. **NIOSH**
- Supported a national research and intervention program to protect the health and safety of construction workers. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Florida

- Funded Florida's Nova University for a randomized clinical trial of a pre-pregnancy intervention with women at high risk for an alcohol-exposed pregnancy. **NCBDDD**
- Funded programs in Florida to collect and analyze information concerning prevalence of autism and related developmental disabilities. **NCBDDD**
- Funded the Florida Department of Education in support of school health programs to reduce chronic disease risk factors, including tobacco use, substandard eating habits, physical activity, and obesity. **NCCDPHP**
- Funded a program to educate the public regarding the burden of arthritis and implement and promote interventions to decrease the effect of arthritis and improve quality of life. **NCCDPHP**
- Funded community hospitals, health networks, and universities for asthma education and personalized asthma-control plans for innercity families. **NCEH**
- Funded communities for identifying and addressing environmental health problems by using the Protocol for Assessing Community Excellence in Environmental Health tool. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Florida's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Conducted follow up with anthrax survivors to determine if they have suffered from any sequelae after their anthrax infection. **NCID**
- Provided funding to the Florida Coalition Against Domestic Violence for development and implementation of prevention activities that can be integrated into coordinated community responses or other community-based collaborations. **NCIPC**
- Supported researchers at the University of South Florida in development of a method to accurately assess common short-term occupational heat exposures of workers wearing heavy protective clothing. **NIOSH**
- Supported a study at the University of Miami to examine national patterns and trends of U.S. worker health and safety by using the National Health Interview Survey and a mortality follow-up component. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Florida in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of South Florida to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Public Health Leadership Institute at the University of South Florida to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Georgia

- Funded programs for developing and evaluating interventions for children with fetal alcohol syndrome or other alcohol-related birth defects to maximize developmental potential and reduce the risk for developing secondary conditions. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded efforts to increase public awareness regarding high blood pressure and signs and symptoms of heart attack and stroke. **NCCDPHP**
- Provided funds and program development consultation to operate Georgia's diabetes prevention and control program, which works to improve the quality of diabetes care and prevent or delay serious diabetes-related complications. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded development of the Environmental Health Specialists Network, a network of environmental health specialists who work with epidemiologists and laboratorians to collect data regarding food-handling practices and how those practices relate to foodborne illnesses. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided continuation funding for a cooperative agreement with Emory University School of Medicine to assess the quality of diagnosis and prevention of complications associated with bleeding disorders among women. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Georgia's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the Georgia Division of Public Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funding for state efforts to prevent fire-related injuries by increasing the prevalence of smoke alarms among high-risk homes identified for assessment and intervention in communities at high risk. **NCIPC**
- Funded the Council of State and Territorial Epidemiologists in strengthening state activities to prevent occupational disease by coordinating multistate programs and facilitating communication among states and academic communities. **NIOSH**
- Supported Project IMHOTEP at Morehouse College, an internship program that provides minority undergraduate students with training in biostatistics, epidemiology, and occupational safety and health. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Provided financial support for enhancing surveillance for pertussis to better document disease burden and conduct epidemiologic studies. **NIP**
- Funded the Academic Center for Public Health Preparedness at Emory University to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Funded the Advanced Practice Center for Public Health Preparedness in the DeKalb County Health Department as part of the Health Alert Network to focus on operational readiness, communications/information technology, and training applications. **PHPPPO**

## CDC's Public Health Partnership with Hawaii

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded Hawaii's education agency for implementation of the Youth Risk Behavior Survey (YRBS), support of human immunodeficiency virus (HIV) prevention education for youth, and support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, substandard eating habits, physical activity, and obesity). **NCCDPHP**
- Evaluated Behavioral Risk Factor Surveillance System (BRFSS) data, which provide empirical support that allowed Hawaii's Department of Health to spend 25% of the state's tobacco settlement money for disease prevention and promotion of healthy lifestyles related to physical activity, nutrition, and smoking cessation. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided a field assignee for TB-elimination program assistance, resulting in better services for patients. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Hawaii's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Assisted in evaluating diagnostic assays for leptospirosis, a disease endemic in Hawaii. **NCID**
- Funded the University of Hawaii at Manoa for establishment of a national academic center of excellence on youth violence to address this critical public health problem. **NCIPC**
- Funded the Hawaii Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded an undergraduate interdisciplinary program at the University of Hawaii at Hilo, through which students in nursing, chemistry, and psychology attend four courses and graduate with a minor in occupational health and safety. **NIOSH**
- Funded the state-based Adult Blood Lead Epidemiology and Surveillance Program (ABLES) for tracking and responding to cases of excessive lead exposure. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Hawaii in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Idaho

- Funded Idaho's education agency in support of human immunodeficiency virus (HIV) prevention education for youth and to implement the Youth Risk Behavior Survey (YRBS). **NCCDPHP**
- Evaluated Behavioral Risk Factor Surveillance System (BRFSS) data to document need for and monitor progress of prevention programs targeting chronic diseases, substandard nutrition, tobacco use, alcohol use, drug use, and radon awareness. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance to the Idaho State Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Idaho's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided technical assistance to the U.S. Forest Service for development of mold-remediation protocols for their office building in McCall, Idaho. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Idaho in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Illinois

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded programs for developing and evaluating interventions for children with fetal alcohol syndrome or other alcohol-related birth defects to maximize developmental potential and reduce the risk for developing secondary conditions. **NCBDDD**
- Funded projects for building public health capacity and infrastructure to support program leadership, monitoring of oral diseases and risk factors, development of oral health plans and coalitions, and development and evaluation of prevention programs. **NCCDPHP**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Funded use of innovative collaborative approaches to improve overall asthma management among urban Chicago children aged  $\leq 18$  years, as well as funded community hospitals, health networks, and universities for asthma education and personalized asthma-control plans for innercity families. **NCEH**
- Funded schools of public health to assist state and local health departments for development of effective, state-of-the-art environmental public health programs to improve response to current and emerging health threats and to expand the science base in environmental public health. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Continued the Chicago Antimicrobial Resistance Project (CARP) to control antimicrobial resistance in a system of four hospitals, focusing on infection-control practices and judicious use of antimicrobials for patients. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Illinois' terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the Illinois Department of Public Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the Illinois Department of Health to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Funded the Great Lakes Center for Occupational and Environmental Safety and Health for providing graduate, residency, and fellowship training in occupational and environmental medicine, occupational health nursing, industrial hygiene, and toxicology. **NIOSH**
- Supported Rush-Presbyterian St. Luke's Medical Center in Chicago in development and testing of interventions to phase-delay shift workers' circadian clocks (i.e., gradually "set it later") so that workers effectively adjust to night-work schedules common in nursing and industry. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Provided financial support for enhancing surveillance for pertussis to better document disease burden and conduct epidemiologic studies. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Illinois in Chicago to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Mid-America Regional Public Health Leadership Institute at the University of Illinois to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Indiana

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded Indiana's education agency for implementation of the Youth Risk Behavior Survey (YRBS), support of human immunodeficiency virus (HIV) prevention education for youth, and support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, substandard eating habits, physical activity, and obesity). **NCCDPHP**
- Supported the School Physical Activity and Nutrition Survey to obtain baseline data related to nutrition and physical activity habits of Indiana children. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Indiana's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided epidemiologic and laboratory technical assistance to the Indiana State Health Department to investigate an outbreak of histoplasmosis among high school students. **NCID**
- Provided funding to the Indiana State Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded a Purdue University study that assessed the nature of farm injuries among Amish communities and developed best-practices interventions to prevent such injuries. **NIOSH**
- Through Purdue University, funded the Construction Safety Alliance, a consortium that connects programs focusing on construction-engineering approaches for safety and health research. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Indiana in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Iowa

- Funded Iowa's Center for Birth Defects Research and Prevention for participation in a collaborative study of causes of 30 birth defects; Iowa's center contributes data regarding 300 cases and 100 controls annually and conducts regional birth-defects research. **NCBDDD**
- Funded fetal alcohol syndrome media campaigns aimed at reducing prenatal alcohol use. **NCBDDD**
- Assisted in the development of the Lighten Up Iowa Project to encourage residents to adopt better nutrition and physical activity habits. **NCCDPHP**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Funded Iowa's public health laboratory to build capacity for conducting a state biomonitoring program. **NCEH**
- Provided the Iowa Department of Health with funding and technical assistance for implementing the Comprehensive Assessment of Rural Health in Iowa, a cooperative health-tracking activity that will create baseline health data for a selected rural community in Iowa. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Iowa's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Participated with Iowa State University and the U.S. Department of Agriculture in research related to developing veterinary vaccines against Nipah virus. **NCID**
- Funded an injury control center at the University of Iowa for conducting research regarding prevention and control of rural injuries. **NCIPC**
- Funded a national program for playground safety at the University of Northern Iowa that focuses on ways to make playground environments safer for children. **NCIPC**
- Funded the Great Plains Center for Agricultural Health, which is based at the University of Iowa and has been a vital resource since 1990 for agricultural health and safety in Iowa, Kansas, Missouri, and Nebraska. **NIOSH**
- Funded the Heartland Education and Research Center for providing graduate training, continuing education, and outreach programs in the region, which has rates of occupational disease and injury higher than those of the rest of the United States. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Iowa in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Iowa to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPO**
- Worked with Central Iowa Health Systems, a public-private partnership, to develop the managerial and leadership competencies of public health officials and others whose work intersects that of public health. **PHPPO**

## CDC's Public Health Partnership with Kansas

- Funded Kansas' education agency for implementation of the Youth Risk Behavior Survey (YRBS), support of human immunodeficiency virus (HIV) prevention education for youth, and support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, substandard eating habits, physical activity, and obesity). **NCCDPHP**
- Provided block grant funds in Wichita to conduct 9,649 blood pressure checks, of which 1,328 were referred for follow-up care. **NCCDPHP**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Kansas' terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to the Kansas State Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Provided funding to the Kansas Department of Health and Environment for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funding for state efforts to prevent fire-related injuries by increasing the number of homes with functioning smoke alarms. **NCIPC**
- Funded the state-based Adult Blood Lead Epidemiology and Surveillance Program (ABLES) for tracking and responding to cases of excessive lead exposure. **NIOSH**
- Investigated the death of a high school student and part-time farmer, aged 16 years, who was killed after the tractor on which she was riding as a passenger overturned. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Kansas in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Provided funding and worked with the Public Health Leadership Institute at the University of Kansas Medical School to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**
- Funded the Advanced Practice Center for Public Health Preparedness in the Lawrence-Douglas County Health Department as part of the Health Alert Network to focus on operational readiness, communications/information technology, and training applications. **PHPPPO**

## CDC's Public Health Partnership with Kentucky

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Kentucky's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to the University of Kentucky School of Pharmacy for development of methods to improve medication use. **NCID**
- Provided funding to the Kentucky Department of Public Health to prevent residential fire-related injuries and deaths by increasing the prevalence of homes with functioning smoke alarms. **NCIPC**
- Provided funds to the Kentucky Cabinet for Health Services to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Funded a University of Louisville study to assess potential adverse health effects from past and current exposures of workers at the Paducah Gaseous Diffusion Plant, which produces enriched uranium. **NIOSH**
- Supported the University of Kentucky's study to investigate the incidence and distribution of workplace violence among male and female long-haul truck drivers and the effects of violence on their mental health. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Kentucky in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Provided funding and worked with the Public Health Leadership Institute at the University of Kentucky to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Louisiana

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded the Louisiana Department of Education in support of human immunodeficiency virus (HIV) prevention education for youth. **NCCDPHP**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Assisted Louisiana's Department of Health in investigating pesticide exposures related to use of pesticides in controlling West Nile Virus. **NCEH**
- Funded Louisiana's public health laboratory to build capacity for conducting a state biomonitoring program. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Participated in regional training for vector-control personnel in insecticide resistance and surveillance techniques; also provided technical assistance under the Emerging Infections Program for monitoring insecticide resistance among disease vectors in Louisiana. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Louisiana's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded Louisiana State University's study to determine how spinal ligaments cause spinal instability, injury, and low-back pain during cyclic and prolonged occupational activities. **NIOSH**
- Provided technical assistance to the Indian Health Service to assess whether exposure to mold could present a health risk to construction workers at a casino and resort hotel in Marksville, Louisiana. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Louisiana in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at Tulane University to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the South Central Public Health Leadership Institute at Tulane University to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Maine

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded the Maine Cardiovascular Health Program for training partners and managed care organizations regarding use of health-care system supports to increase quality of care and better prevent heart disease and stroke. **NCCDPHP**
- Funded Maine's education agency for implementation of the Youth Risk Behavior Survey (YRBS), support of human immunodeficiency virus (HIV) prevention education for youth, and support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, substandard eating habits, physical activity, and obesity). **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided a field assignee for TB-elimination program assistance, resulting in better services for patients. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Maine's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to Maine Medical Center for research related to the ecology of Lyme disease. **NCID**
- Provided funding to the Maine Department of Human Services to implement comprehensive and effective suicide-prevention programs. **NCIPC**
- Provided funds to the Maine Department of Human Services to plan prevention and intervention activities regarding violence against women. **NCIPC**
- Funded the Maine Department of Health for providing a best-practices forum for employers to share success stories concerning cost-effective occupational safety and health interventions. **NIOSH**
- Supported the Maine Department of Labor in development and implementation of a state-based surveillance program. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Maine in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Maryland

- Funded fetal alcohol syndrome (FAS) awareness and education projects for development, implementation, and evaluation of educational curricula for training parents, school staff, law enforcement personnel, and public health providers regarding FAS and other alcohol-related birth defects and accessing appropriate services for affected children and their families. **NCBDDD**
- Funded research for identifying markers or tests of alcohol use during pregnancy. **NCBDDD**
- Funded the Baltimore education agency for implementation of the Youth Risk Behavior Survey (YRBS) and policies, environmental changes, and educational strategies to reduce asthma-related illnesses. **NCCDPHP**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Provided Maryland's Department of Health with funds and technical assistance for *Pfiesteria*-related illness surveillance and prevention. **NCEH**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Initiated an anthrax vaccine research program at the Walter Reed Army Institute of Research; the study is examining the safety and efficacy of the anthrax vaccine and includes 300 volunteers. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Maryland's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded an injury control center at Johns Hopkins University for addressing all phases of injury control, including research, education, and implementation of community programs. **NCIPC**
- Funded Johns Hopkins University for establishment of a national academic center of excellence on youth violence to address this critical public health problem. **NCIPC**
- Funded the University of Maryland for assessment of the relation between organization of work and the prevalence of depression and musculoskeletal disorders among home health-care workers. **NIOSH**
- Funded the University of Maryland's study to evaluate effectiveness of existing guidelines for workers in state mental health facilities by comparing assault rates, risk factors for assault, and worker job satisfaction before and after the implementation of a comprehensive violence-prevention program. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Maryland in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the Johns Hopkins University to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Mid-Atlantic Regional Leadership Institute at Johns Hopkins to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Massachusetts

- Funded Massachusetts' Center for Birth Defects Research and Prevention for participation in a collaborative study of causes of 30 birth defects; Massachusetts' center contributes data regarding 300 cases and 100 controls annually and conducts regional birth-defects research. **NCBDDD**
- Funded fetal alcohol syndrome (FAS) awareness and education projects for development, implementation, and evaluation of educational curricula for training parents, school staff, law enforcement personnel, and public health providers regarding FAS and other alcohol-related birth defects and accessing appropriate services for affected children and their families. **NCBDDD**
- Supported the Cambodian Community Health 2010 project in Lowell, which focuses on cardiovascular disease and diabetes among Massachusetts' Cambodian population. **NCCDPHP**
- Provided funding and technical assistance for planning statewide nutrition and physical activity interventions and conducting demonstration interventions through population-based strategies (e.g., making policy-level changes and social marketing). **NCCDPHP**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Massachusetts' terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Continued a cooperative agreement to expand a surveillance system (NaSH "Lite") for blood exposures, including needlesticks, in hospitals and other health-care facilities; also began developing a workbook regarding needlestick-prevention programs in health-care facilities. **NCID**
- Funded an injury control center at Harvard University for research regarding reducing the incidence, severity, and adverse consequences of injury. **NCIPC**
- Funded the Harvard Injury Control Research Center for establishment of a national academic center of excellence on youth violence to address this critical public health problem. **NCIPC**
- Supported the University of Massachusetts' study of work environments as primary mediators of the effect of socioeconomic position on health; the study focused on health-care workers, a population exposed to known hazards and who are diverse in socioeconomic status, sex, and ethnicity. **NIOSH**
- Funded Tufts University for an economic and job-hazard analysis of materials that can be used in abrasive blasting, instead of silica, which causes the disabling disease silicosis. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Provided financial support for enhancing surveillance for pertussis to better document disease burden and conduct epidemiologic studies. **NIP**
- Funded the Academic Center for Public Health Preparedness at Harvard University to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Leadership Institute at Boston University to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Michigan

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Provided funds and program development consultation for Michigan to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Supported the Genesee County Precious Black Babies Project, which emphasizes reduction of racial disparities in health outcomes, including a focus on infant mortality. **NCCDPHP**
- Provided technical assistance, training, and proficiency testing regarding methods used to measure chemical terrorism agents in laboratory samples taken from humans. **NCEH**
- Provided funds and technical assistance to the Michigan Department of Health for a long-term study of Michigan residents exposed to polybrominated biphenyls. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided laboratory support, in collaboration with Michigan Department of Community Health Laboratory, in an epidemiologic investigation of vancomycin-resistant *Staphylococcus aureus*. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Michigan's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the University of Michigan for establishment of a national academic center of excellence on youth violence to address this critical public health problem. **NCIPC**
- Provided funding to the Michigan Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded the University of Michigan's study of 12,000 truck drivers to estimate incidence rates of injuries and medical care use, and to develop different models to measure lost work-time resulting from these injuries. **NIOSH**
- Funded the Michigan Education and Research Center for providing comprehensive academic and research training in occupational health nursing, industrial hygiene, occupational medicine, and safety engineering and ergonomics. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Michigan to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Public Health Leadership Institute at the University of Michigan to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Minnesota

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Provided funds and program development consultation for Minnesota to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Funded implementation of Minnesota's tobacco-use prevention and control program. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded development of the Environmental Health Specialists Network, a network of environmental health specialists who work with epidemiologists and laboratorians to collect data regarding food-handling practices and how those practices relate to foodborne illnesses. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Minnesota's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funds and technical assistance to Minnesota for the Emerging Infections Program, a population-based network of CDC and state health departments working with other partners (e.g., academic centers, local health departments, infection-control practitioners, and other federal agencies) to assess the public health effect of emerging infections and to evaluate methods for their prevention and control. **NCID**
- Funded the Minnesota Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funding to conduct population-based surveillance for characterizing risk factors, incidence, external causes, severity, and short-term outcomes of traumatic brain injury. **NCIPC**
- Supported the University of Minnesota in helping farm-safety advocates adapt the North American Guidelines for Childhood Agricultural Tasks to the needs of farm families from ethnic minority communities in the United States. **NIOSH**
- Funded the University of Minnesota's study of the effects on maternal health of total workload (i.e., hours of paid and unpaid work), use of family medical leave, job stress, and work-family conflict at critical times after childbirth. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Provided financial support for enhancing surveillance for pertussis to better document disease burden and conduct epidemiologic studies. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Minnesota to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Mississippi

- Provided funds and program development consultation for Mississippi to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Evaluated Behavioral Risk Factor Surveillance System (BRFSS) data to estimate the prevalence of tobacco use in Mississippi. **NCCDPHP**
- Funded community hospitals, health networks, and universities for asthma education and personalized asthma-control plans for innercity families. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided epidemiologic and laboratory technical assistance to the Mississippi State Health Department for investigation of a hospital-based outbreak of *Candida parapsilosis* among adults in a community hospital. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Mississippi's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funding to reduce the incidence of death and disability related to residential fires by increasing the prevalence of smoke alarms. **NCIPC**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Mississippi in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Missouri

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded fetal alcohol syndrome (FAS) regional training centers for development and dissemination of curricula for medical and allied health students and practitioners; the curricula incorporate evidence-based diagnostic guidelines for FAS and other prenatal alcohol-related disorders. **NCBDDD**
- Provided funds and program development consultation for Missouri to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Funded efforts to increase public awareness regarding high blood pressure and signs and symptoms of heart attack and stroke. **NCCDPHP**
- Funded Missouri's public health laboratory to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Awarded a cooperative agreement to assess the reproducibility and outcome of implementing a program to promote hand hygiene in a health-care system. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Missouri's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funding to the Missouri Department of Health to establish a comprehensive surveillance system for nonfatal maltreatment of children aged <10 years. **NCIPC**
- Provided funds to the Missouri Department of Health and Senior Services to plan prevention and intervention activities regarding violence against women. **NCIPC**
- Funded the Missouri Department of Health for development and implementation of interventions to prevent occupational asthma. **NIOSH**
- Supported research at Washington University regarding the relation between temporary and permanent threshold shifts in hearing to identify factors associated with increased noise susceptibility and to develop effective strategies to reduce noise-induced hearing loss among workers. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Missouri in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at Saint Louis University to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Missouri Public Health Leadership Institute at Saint Louis University to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Montana

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded the University of Montana's program to improve understanding of unique health conditions of persons with disabilities to identify health risks and protective factors, and to measure health promotion activity effectiveness for preventing adverse conditions related to living with a disability. **NCBDDD**
- Provided funds and program development consultation for Montana to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Assisted in addressing Montana's dental-care-access crisis by educating health advocates regarding effectiveness of fluoride in preventing dental decay. **NCCDPHP**
- Funded Montana's public health laboratory as part of the six-state Rocky Mountain Consortium, which also includes Arizona, Colorado, New Mexico, Utah, and Wyoming, to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Funded a cooperative agreement with Montana Tech University to continue long-term studies of the natural history of hantavirus in rodent hosts. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Montana's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funding to the Montana Department of Health to reduce the number of residential fire-related injuries in communities at high-risk by increasing the prevalence of smoke alarms. **NCIPC**
- Funded the Montana Coalition Against Domestic and Sexual Violence for development and implementation of prevention activities that can be integrated into coordinated community responses or other community-based collaborations. **NCIPC**
- Funded comprehensive undergraduate and graduate training programs in occupational safety and health and industrial hygiene at the University of Montana, focusing on mining, welding, and oil-production safety for engineers. **NIOSH**
- Funded the state-based Adult Blood Lead Epidemiology and Surveillance Program (ABLES) for tracking and responding to cases of excessive lead exposure. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Montana in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**
- Worked with state and local officials in assessing and improving the capacity of public health systems and governing bodies to meet National Public Health Performance Standards for delivering essential health services. **PHPPPO**

## CDC's Public Health Partnership with Nebraska

- Funded implementation of Nebraska's tobacco-use prevention and control program. **NCCDPHP**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Nebraska's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to the Nebraska State Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Funded the Nebraska Health and Human Services System for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the Nebraska Health and Human Services System to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Funded the state-based Fatality Assessment and Control Evaluation (FACE) Program, which formulates prevention strategies for work situations with a high risk of fatality. **NIOSH**
- Funded the Nebraska Department of Health and Human Services for development and implementation of interventions to prevent occupational asthma. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Nebraska in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Nevada

- Funded the University of Nevada's program to improve understanding of unique health conditions of persons with disabilities to identify health risks and protective factors, and to measure health promotion activity effectiveness for preventing adverse conditions related to living with a disability. **NCBDDD**
- Funded projects for building public health capacity and infrastructure to support program leadership, monitoring of oral diseases and risk factors, development of oral health plans and coalitions, and development and evaluation of prevention programs. **NCCDPHP**
- Funded Nevada's education agency in support of human immunodeficiency virus (HIV) prevention education for youth and to implement the Youth Risk Behavior Survey (YRBS). **NCCDPHP**
- Assisted Nevada's Department of Health with an investigation of a cluster of cases of acute lymphocytic leukemia among children living in Churchill County (Fallon), Nevada. **NCEH**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Assisted Nevada's health department with an investigation of a childhood leukemia cluster in Fallon to assess the possible role of retroviruses in the etiology of childhood leukemia. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Nevada's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the University of Nevada's suicide-prevention research center for identifying persons at risk for suicide and for serving the intermountain western region, including Colorado, Arizona, Nevada, Utah, New Mexico, Idaho, Montana, and Wyoming. **NCIPC**
- Funded the Nevada State Health Division for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Conducted an evaluation at Lake Mead of engineering control devices that were retrofitted onto gasoline-powered generators on houseboats to reduce hazards of carbon monoxide from exhaust. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Nevada in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with New Hampshire

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Assisted the New Hampshire Department of Health and Human Services in developing a partnership with the Environmental Protection Agency in Boston to implement the indoor air quality Tools for Schools program. **NCCDPHP**
- Provided funding, technical assistance, standards for data collection and use, training, and support for establishment of a computerized reporting and data-processing system to improve the completeness, timeliness, and quality of cancer registry data. **NCCDPHP**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving New Hampshire's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Investigated an outbreak of conjunctivitis among college students. **NCID**
- Funded the New Hampshire Department of Health and Human Services for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the New Hampshire Department of Health and Human Services to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**

## CDC's Public Health Partnership with New Jersey

- Funded fetal alcohol syndrome (FAS) regional training centers for development and dissemination of curricula for medical and allied health students and practitioners; the curricula incorporate evidence-based diagnostic guidelines for FAS and other prenatal alcohol-related disorders. **NCBDDD**
- Funded programs in New Jersey to collect and analyze information concerning prevalence of autism and related developmental disabilities. **NCBDDD**
- Provided funding, technical assistance, standards for data collection and use, training, and support for establishment of a computerized reporting and data-processing system to improve the completeness, timeliness, and quality of cancer registry data. **NCCDPHP**
- Funded New Jersey's education agency in support of human immunodeficiency virus (HIV) prevention education for youth and to implement the Youth Risk Behavior Survey (YRBS). **NCCDPHP**
- Collaborated with the Environmental and Occupational Health Sciences Institute, a joint institute of Rutgers University and the University of Medicine and Dentistry of New Jersey, Robert Wood Johnson Medical School, on a study to evaluate exposure to pesticides among pregnant women and resulting adverse health outcomes. **NCEH**
- Funded implementation of Open Airways for Schools, a scientifically evaluated asthma intervention, the goals of which are to improve school performance and self-management behaviors and to decrease the number of asthma episodes. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving New Jersey's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided continuation funding for multiple cooperative agreements with the Robert Wood Johnson Medical School to 1) investigate coagulopathy-related intrauterine growth restriction, 2) assess the diagnosis and prevention of complications associated with bleeding disorders among women, 3) develop, implement, and assess a screening tool for identifying bleeding disorders among reproductive-aged women, and 4) initiate models of integrated care for persons with clotting disorders in hemophilia treatment centers. **NCID**
- Provided funding to conduct population-based traumatic brain injury surveillance and design prevention programs that address specific causes and populations at high risk. **NCIPC**
- Funded the New Jersey Department of Health and Senior Services for establishment of a statewide violent death information-collection system. **NCIPC**
- Supported a study by the University of Medicine and Dentistry to determine the effects of work organization on workers' health and productivity as well as to explore the relation between work organization and workplace crisis-intervention programs offered to employees in the aftermath of the September 11, 2001, terrorist attacks on the World Trade Center. **NIOSH**
- Funded the state-based Fatality Assessment and Control Evaluation (FACE) Program, which formulates prevention strategies for work situations with a high risk of fatality. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted New Jersey in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with New Mexico

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded projects for developing and implementing effective health promotion and wellness programs for persons with disabilities and collaborations among states, research hospitals, and universities. **NCBDDD**
- Evaluated and provided Behavioral Risk Factor Surveillance System (BRFSS) data to the arthritis and osteoporosis programs of New Mexico's Department of Health to estimate the need for services, education, and training workshops related to living with arthritis. **NCCDPHP**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Provided technical assistance, training, and proficiency testing regarding methods used to measure chemical terrorism agents in laboratory samples taken from humans. **NCEH**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided funds and technical assistance to New Mexico for the Emerging Infections Program, a population-based network of CDC and state health departments working with other partners (e.g., academic centers, local health departments, infection control practitioners, and other federal agencies) to assess the public health effect of emerging infections and to evaluate methods for their prevention and control. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving New Mexico's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the New Mexico Department of Health Services for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the New Mexico Department of Health to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Funded a study of the deposition pattern of airborne asbestos and man-made vitreous fibers in human respiratory tracts, which will help assess workers' exposure to these fibers. **NIOSH**
- Supported the New Mexico Department of Health in establishing a state-based system for occupational health surveillance. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted New Mexico in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Worked with state and local officials in assessing and improving the capacity of public health systems and public health governing bodies to meet National Public Health Performance Standards for delivering essential health services. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with New York

- Funded development of a system to identify children with fetal alcohol syndrome (FAS) that uses multiple sources to provide more accurate prevalence data; funds for case management and health-care provider education were included also. **NCBDDD**
- Funded the SUNY Upstate Medical Center's and Columbia University's programs to improve understanding of unique health conditions of persons with disabilities to identify health risks and protective factors, and to measure health promotion activity effectiveness for preventing adverse conditions related to living with a disability. **NCBDDD**
- Funded the New York Department of Education and the New York City education agency in support of human immunodeficiency virus (HIV) prevention education for youth and implement the Youth Risk Behavior Survey (YRBS). **NCCDPHP**
- Provided funds and program development consultation for New York to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Provided the New York City Department of Health with technical assistance to determine the physical and mental health needs among lower Manhattan residents after the 2001 terrorists attacks on the World Trade Center. **NCEH**
- Funded the New York State Department of Health and the New York City Department of Health and Mental Hygiene to plan and implement environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided continuation funding for a cooperative agreement with the Rochester Hemophilia Treatment Center to assess the diagnosis and prevention of complications associated with bleeding disorders among women. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving New York's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded Columbia University for establishment of a national academic center of excellence on youth violence to address this critical public health problem. **NCIPC**
- Funded the State of New York Department of Health for development of an affordable booster seat that meets existing federal standards and provides crash-injury protection. **NCIPC**
- Awarded an \$11.8-million contract to the Mt. Sinai School of Medicine for identification and assessment of symptoms, injuries, or conditions that can indicate long-term adverse physical or mental health effects among workers and volunteers who participated in rescue and recovery efforts at the World Trade Center site. **NIOSH**
- After the World Trade Center collapse, evaluated potential exposure of workers (e.g., teachers, City of New York employees, office workers, transportation workers, and disaster relief workers) to silica dust, asbestos, and other hazardous materials and provided recommendations for addressing adverse health effects among these workers. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Funded the Academic Center for Public Health Preparedness at Columbia University and the State University of New York, Albany, to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Northeast Public Health Leadership Institute at the State University of New York, Albany, to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with North Carolina

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded North Carolina's Center for Birth Defects Research and Prevention for participation in a collaborative study of causes of 30 birth defects; North Carolina's center contributes data regarding 300 cases and 100 controls annually and conducts regional birth-defects research. **NCBDDD**
- Funded efforts to increase public awareness regarding high blood pressure and signs and symptoms of heart attack and stroke. **NCCDPHP**
- Provided funds and program development consultation for North Carolina to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Collaborated with Wake Forest University on a study evaluating pesticide exposure among Hispanic children, suburban children, and children from migrant farm families. **NCEH**
- Funded an asthma project at the University of North Carolina to 1) design and implement methodologies to estimate the number of school days or work days missed because of asthma, 2) validate these estimates by using an appropriate methodology, and 3) compare estimates obtained at the local level with national estimates as appropriate to identify factors that are associated with school or work missed because of asthma. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Investigated an outbreak among >200 persons of *Escherichia coli* O157:H7 infection associated with consumption of butter made with unpasteurized milk. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving North Carolina's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded an injury prevention research center at the University of North Carolina for exploration of health-care concerns regarding injury prevention, acute care, and rehabilitation. **NCIPC**
- Funded the North Carolina Department of Health and Human Services for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Supported the Southern Coastal Agromedicine Center in addressing agricultural, forestry, and fishing health and safety concerns common to the southeastern coastal plains and the southern Appalachian region of the United States. **NIOSH**
- Funded North Carolina State University for an evaluation of new excavation methods to reduce hazards to construction workers. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted North Carolina in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of North Carolina to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Southeast Public Health Leadership Institute at the University of North Carolina to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with North Dakota

- Provided funds and program development consultation for North Dakota to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Funded implementation of North Dakota's tobacco-use prevention and control program. **NCCDPHP**
- Funded North Dakota's public health laboratory as part of a three-state consortium, which also includes Minnesota and South Dakota, to build capacity for conducting a state biomonitoring program. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving North Dakota's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to the North Dakota State Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Provided funding to the North Dakota Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the North Dakota Department of Health to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Investigated the death of a male volunteer fire fighter, aged 44 years, who was fatally injured when a shell exploded while he was loading fireworks at a public display. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted North Dakota in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Ohio

- Funded fetal alcohol syndrome (FAS) awareness and education projects for development, implementation, and evaluation of educational curricula for training parents, school staff, law enforcement personnel, and public health providers regarding FAS and other alcohol-related birth defects and accessing appropriate services for affected children and their families. **NCBDDD**
- Funded research for identifying markers or tests of alcohol use during pregnancy. **NCBDDD**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Collaborated with the University of Cincinnati on a study to evaluate pesticide exposures among pregnant minority women and resulting adverse health outcomes, and participated in a study assessing exposure to atrazine and its relation to cryptorchidism (undescended testicles). **NCEH**
- Funded communities for identifying and addressing environmental health problems by using the Protocol for Assessing Community Excellence in Environmental Health tool. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance to promote national surveillance for prion diseases by the National Prion Disease Pathology Surveillance Center located at Case Western Reserve University in Cleveland. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Ohio's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided funding to the Ohio Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded a project for development of a remote door-entry assistive device for persons with traumatic brain or spinal cord injuries and other disabling conditions. **NCIPC**
- Funded the University of Cincinnati for development of methods to identify mycobacteria in metal-working fluids, a potential cause of occupational respiratory illness. **NIOSH**
- Supported the Great Lakes Center for Agricultural Safety and Health at Ohio State University in conducting such studies as assessing the prevalence of asthma among farmers and their spouses and implementing and evaluating sun-safety interventions for persons applying pesticides and other agricultural workers. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Ohio in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the Ohio State University to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Provided funding and worked with the Public Health Leadership Institute at the Ohio State Health Department to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Oklahoma

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded programs for developing and evaluating interventions for children with fetal alcohol syndrome or other alcohol-related birth defects to maximize developmental potential and reduce the risk for developing secondary conditions. **NCBDDD**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Funded implementation of Oklahoma's tobacco-use prevention and control program. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Oklahoma's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided epidemiologic assistance with analysis of increased reporting of tularemia cases. **NCID**
- Funded the Oklahoma State Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded the Oklahoma State Department of Health to reduce the incidence of death and disability related to residential fires by increasing the prevalence of smoke alarms. **NCIPC**
- Funded the University of Oklahoma for identification of mechanisms through which exposure to chemicals promotes noise-induced hearing loss; fire fighters, heavy-equipment operators, tunnel and toll workers, and truck drivers are exposed routinely to noise and chemicals simultaneously. **NIOSH**
- Funded the state-based Fatality Assessment and Control Evaluation (FACE) Program, which formulates prevention strategies for work situations with a high risk of fatality. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Assisted Oklahoma in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Oklahoma to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPO**
- Worked with the Public Health Leadership Institute at the Oklahoma Department of Health to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPO**

## CDC's Public Health Partnership with Oregon

- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded the Oregon Health Sciences University program to improve understanding of unique health conditions of persons with disabilities to identify health risks and protective factors, and to measure health promotion activity effectiveness for preventing adverse conditions related to living with a disability. **NCBDDD**
- Funded implementation of Oregon's tobacco-use prevention and control program. **NCCDPHP**
- Funded Oregon's education agency for implementation of the Youth Risk Behavior Survey (YRBS), support of human immunodeficiency virus (HIV) prevention education for youth, and support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, substandard eating habits, physical activity, and obesity). **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided funds and technical assistance to Oregon for the Emerging Infections Program, a population-based network of CDC and state health departments working with other partners (e.g., academic centers, local health departments, infection control practitioners, and other federal agencies) to assess the public health effect of emerging infections and to evaluate methods for their prevention and control. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Oregon's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the Oregon Health Division for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded the Oregon Department of Health Services for establishment of a statewide violent death information-collection system. **NCIPC**
- Supported researchers at Oregon Health Sciences University in evaluating the effectiveness of the pesticide-safety training materials that are commonly available to adolescent migrant farm workers. **NIOSH**
- Funded Oregon University for an evaluation of whether a computer-based program that includes the ability to enter content to create new programs can be used by health and safety specialists to provide cost-effective, customized training for workers. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Pennsylvania

- Funded centers of excellence in autism and pervasive developmental disabilities epidemiology for collecting and analyzing information regarding the number, incidence, correlates, and causes of autism and related developmental disabilities. **NCBDDD**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Provided funding and technical assistance for planning statewide nutrition and physical activity interventions and conducting demonstration interventions through population-based strategies (e.g., making policy-level changes and social marketing). **NCCDPHP**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Funded Pennsylvania cities in support of development of urban rodent control and building of environmental public health capacity in state and local public health departments. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided a field assignee for TB-elimination program assistance, resulting in better services for patients. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Pennsylvania's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided assistance to Pennsylvania Department of Health officials and to hospital infection-control staff in investigating an infection caused by vancomycin-resistant *Staphylococcus aureus*, which was only the second such isolate reported worldwide. **NCID**
- Provided funding for an injury control center at the University of Pittsburgh to provide leadership and coordination for statewide injury control efforts. **NCIPC**
- Funded the Pennsylvania Coalition Against Rape for establishment of the National Sexual Violence Resource Center to strengthen the existing support system serving sexual assault survivors. **NCIPC**
- Funded the University of Pittsburgh's study of the biomechanics of slips among older adults to develop effective fall prevention and training interventions. **NIOSH**
- Evaluated potential lead exposures among users of a newly constructed police department firing range in Langhorne. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Pennsylvania in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Pittsburgh to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPO**

## CDC's Public Health Partnership with Rhode Island

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded projects for building public health capacity and infrastructure to support program leadership, monitoring of oral diseases and risk factors, development of oral health plans and coalitions, and development and evaluation of prevention programs. **NCCDPHP**
- Provided funding and technical assistance for planning statewide nutrition and physical activity interventions and conducting demonstration interventions through population-based strategies (e.g., making policy-level changes and social marketing). **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Rhode Island's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to the Rhode Island State Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Funded the Rhode Island Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the Rhode Island Department of Health for evaluation of alternative approaches to surveillance for fatalities resulting from child maltreatment. **NCIPC**
- Funded the Occupational and Environmental Health Center of Rhode Island for establishment of a database for statewide tracking of the incidence of occupational and environmental illness and injury. **NIOSH**
- Funded the state-based Adult Blood Lead Epidemiology and Surveillance Program (ABLES) for tracking and responding to cases of excessive lead exposure. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Rhode Island in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with South Carolina

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded programs in South Carolina to collect and analyze information concerning prevalence of autism and related developmental disabilities. **NCBDDD**
- Funded efforts to increase public awareness regarding high blood pressure and signs and symptoms of heart attack and stroke. **NCCDPHP**
- Funded South Carolina's education agency for implementation of the Youth Risk Behavior Survey (YRBS), support of human immunodeficiency virus (HIV) prevention education for youth, and support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, substandard eating habits, physical activity, and obesity). **NCCDPHP**
- Funded South Carolina's public health laboratory as part of a two-state consortium, which also includes Georgia, to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for HIV prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving South Carolina's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to the South Carolina State Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Provided funding to the South Carolina Department of Health and Environmental Control for development of a traumatic brain injury surveillance program. **NCIPC**
- Funded the South Carolina Department of Health and Environmental Control for establishment of a statewide violent death information-collection system. **NCIPC**
- Funded the University of South Carolina for development of reliable exposure-assessment methods by investigating how worker exposure to chemicals is affected by such factors as work-area airflow characteristics, work-area physical configuration, source characteristics, and worker activities. **NIOSH**
- Funded the state-based Adult Blood Lead Epidemiology and Surveillance Program (ABLES) for tracking and responding to cases of excessive lead exposure. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported South Carolina in conducting sentinel surveillance for varicella in selected schools. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of South Carolina to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with South Dakota

- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded implementation of South Dakota's tobacco-use prevention and control program. **NCCDPHP**
- Provided funds and program development consultation for South Dakota to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Funded South Dakota's public health laboratory as part of a three-state consortium, which also includes Minnesota and North Dakota, to build capacity for conducting a state biomonitoring program. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving South Dakota's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Assisted in an investigation of naturally acquired cutaneous anthrax. **NCID**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted South Dakota in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Tennessee

- Funded fetal alcohol syndrome (FAS) regional training centers for development and dissemination of curricula for medical and allied health students and practitioners; the curricula incorporate evidence-based diagnostic guidelines for FAS and other prenatal alcohol-related disorders. **NCBDDD**
- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded the Tennessee Department of Education in support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, substandard eating habits, physical activity, and obesity). **NCCDPHP**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Funded Tennessee's public health laboratory to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded development of the Environmental Health Specialists Network, a network of environmental health specialists who work with epidemiologists and laboratorians to collect data regarding food-handling practices and how those practices relate to foodborne illnesses. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Tennessee's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Participated in regional training for vector-control personnel regarding insecticide resistance and surveillance techniques; also provided technical assistance under the Emerging Infections Program for monitoring insecticide resistance among disease vectors in Tennessee. **NCID**
- Investigated the death of a plumber who was crushed between a lift platform and the mobile home frame under which he was working. **NIOSH**
- Investigated the death of a volunteer fire fighter who become separated and disoriented as he and other fire fighters were responding to a house fire. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Tennessee in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Texas

- Funded Texas' Center for Birth Defects Research and Prevention for participation in a collaborative study of causes of 30 birth defects; Texas' center contributes data regarding 300 cases and 100 controls annually and conducts regional birth-defects research. **NCBDDD**
- Funded the University of Texas Health Sciences Center for a randomized clinical trial of a pre-pregnancy intervention with women at high risk for an alcohol-exposed pregnancy. **NCBDDD**
- Provided funds and program development consultation for Texas to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Provided funding and technical assistance for planning statewide nutrition and physical activity interventions and conducting demonstration interventions through population-based strategies (e.g., making policy-level changes and social marketing). **NCCDPHP**
- Collaborated with Texas A&M University on a study evaluating pesticide exposure among Hispanic children, suburban children, and children from migrant farm families. **NCEH**
- Funded the Houston Department of Health and Human Services in support of planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Texas' terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Investigated an outbreak of *Salmonella* Enteritidis, which was probably associated with salsa consumption, among ≥650 persons at a hotel and conference center. **NCID**
- Provided funds to the Texas Department of Health to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Funded a study at Baylor College of Medicine to determine if case management for traumatic brain injury patients during the first 3 months after an injury would decrease the occurrence of secondary conditions. **NCIPC**
- Funded the Southwest Center for Occupational and Environmental Health for training in industrial hygiene, occupational and environmental medicine, occupational health nursing, occupational safety engineering, occupational epidemiology, and hazardous substances. **NIOSH**
- Funded the state-based Sentinel Event Notification System for Occupational Risk (SENSOR) for tracking and developing interventions to prevent specific occupational diseases. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Utah

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for prenatally diagnosed birth defects. **NCBDDD**
- Funded Utah's Center for Birth Defects Research and Prevention for participation in a collaborative study of causes of 30 birth defects; Utah's center contributes data regarding 300 cases and 100 controls annually and conducts regional birth-defects research. **NCBDDD**
- Provided funds and program development consultation for Utah to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Promoted policy and environmental system supports and public awareness to increase primary and secondary prevention of heart disease and stroke. **NCCDPHP**
- Funded Utah's public health laboratory as part of the six-state Rocky Mountain Consortium which also includes Arizona, Colorado, Montana, New Mexico, and Wyoming, to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded planning and implementation of environmental health-tracking activities, which include ongoing collection, integration, analysis, interpretation, and dissemination of data concerning environmental hazards, exposures to those hazards, and related health effects. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided technical and financial assistance to state and local health authorities for terrorism preparedness before and during the 2002 Salt Lake City Winter Olympics. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Utah's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded the Utah Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funding to the Utah Department of Health for development of a traumatic brain injury surveillance program. **NCIPC**
- Funded the state-based Sentinel Event Notification System for Occupational Risk (SENSOR) for tracking and developing interventions to prevent specific occupational diseases. **NIOSH**
- Funded the Rocky Mountain Center for Occupational and Environmental Health for providing academic, research, and outreach programs in occupational safety and health. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Supported immunization registry sentinel-site efforts to monitor vaccine use patterns and immunization practices (e.g., to study the effect of vaccine shortages on vaccination coverage). **NIP**
- Provided funding and worked with the Great Basin Public Health Leadership Institute at the Utah Department of Health to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Vermont

- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Funded projects for developing and implementing effective health promotion and wellness programs for persons with disabilities and collaborations among states, research hospitals, and universities. **NCBDDD**
- Provided breast and cervical cancer screening and diagnostic services to uninsured/underinsured, low-income women through the National Breast and Cervical Cancer Early Detection Program. **NCCDPHP**
- Provided funds and program development consultation for Vermont to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Vermont's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Provided financial and technical assistance to the Vermont State Department of Health for West Nile virus surveillance and enhanced laboratory capacity. **NCID**
- Funded the Vermont Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Provided funds to the Vermont Department of Health to plan prevention and intervention activities regarding violence against women, as identified in state action plans. **NCIPC**
- Responded to a request from a union representing telephone and electrical workers in Vermont to evaluate such health problems as skin irritation, rashes, swelling, and headaches and their possible association with use of creosote-treated utility poles. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Vermont in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Virginia

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded Virginia Commonwealth University for a randomized clinical trial of a pre-pregnancy intervention with women at high risk for an alcohol-exposed pregnancy. **NCBDDD**
- Funded efforts to increase public awareness regarding high blood pressure and the signs and symptoms of heart attack and stroke. **NCCDPHP**
- Provided breast and cervical cancer screening and diagnostic services to uninsured/underinsured, low-income women through the National Breast and Cervical Cancer Early Detection Program. **NCCDPHP**
- Provided technical assistance, training, and proficiency testing regarding methods used to measure chemical terrorism agents in laboratory samples taken from humans. **NCEH**
- Funded use of innovative collaborative approaches to improve overall asthma management among urban areas of Richmond for children aged  $\leq 18$  years. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Assisted state and local health authorities with investigating local malaria transmission in Loudoun County. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Virginia's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded Virginia Commonwealth University for establishment of a national academic center of excellence on youth violence to address this critical public health problem. **NCIPC**
- Provided funding for state efforts to prevent fire-related deaths and injuries by increasing prevalence of smoke alarms in communities at high risk. **NCIPC**
- Supported the University of Virginia for the first randomized control study to quantify how exercise and physical conditioning modify biomechanics in manual materials-handling and lifting tasks. **NIOSH**
- Supported the development of an innovative rockbolt hole-drilling system, which will help reduce the risk of catastrophic rock mass failure and the amount of noise and respirable dust produced during drilling operations in mines. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Virginia in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPD**

## CDC's Public Health Partnership with Washington

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded programs for developing and evaluating interventions for children with fetal alcohol syndrome or other alcohol-related birth defects to maximize developmental potential and reduce the risk for developing secondary conditions. **NCBDDD**
- Provided funds and program development consultation for Washington to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Provided funding and technical assistance to 1) establish broad-based cancer coalitions, 2) enhance epidemiologic support to assess the burden of cancer, and 3) set priorities for developing and implementing a comprehensive cancer-control plan. **NCCDPHP**
- Collaborated with the University of Washington on a study to evaluate pesticide exposure among Hispanic children, suburban children, and children from migrant farm families, and funded Washington's public health laboratory to plan to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded cities in Washington to build environmental public health capacity in state and local departments of public health. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Provided Washington residents with educational materials on dengue and dengue hemorrhagic fever. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Washington's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded an injury control center at the Harborview Medical Center at the University of Washington in Seattle for development, application, and evaluation of strategies to decrease morbidity and mortality from physical trauma. **NCIPC**
- Funded the Washington Department of Health for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded the Pacific Northwest Agricultural Safety and Health Center for conducting programs focusing on preventing occupational disease and injury among workers in the farming, fishing, and forestry industries in Alaska, Idaho, Oregon, and Washington. **NIOSH**
- Funded the Northwest Center for Occupational Health and Safety for providing graduate academic and research programs in industrial hygiene, occupational medicine, occupational health nursing, and occupational safety. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Washington in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Funded the Academic Center for Public Health Preparedness at the University of Washington to strengthen the capacity of the state and local public health workforce to respond to terrorism, infectious disease outbreaks, and other health needs and emergencies. **PHPPO**
- Provided funding and worked with the Northwest Public Health Leadership Institute the University of Washington to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPO**

## CDC's Public Health Partnership with West Virginia

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded programs in West Virginia to collect and analyze information concerning prevalence of autism and related developmental disabilities. **NCBDDD**
- Evaluated Pregnancy Risk Assessment Monitoring System (PRAMS) data to develop the Folic Acid Education Project for preventing birth defects and promoting use of multivitamins by pregnant women. **NCCDPHP**
- Funded implementation of West Virginia's tobacco-use prevention and control program. **NCCDPHP**
- Funded a national asthma-control program that tracks the disease, ensures that scientifically based intervention programs are broadly implemented, and helps partners develop, implement, and evaluate comprehensive statewide asthma programs. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Conducted a field investigation for flying squirrel-associated epidemic typhus as a result of a patient being hospitalized for an extended period. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving West Virginia's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded an injury control and demonstration center at the West Virginia University Research Corporation for planning, direction, and coordination of a statewide program of training and applied research to improve the health of persons residing in rural communities. **NCIPC**
- Provided funding to the West Virginia Department of Health and Human Resources for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded the University of West Virginia's study of the factors leading to failures of underground mine pillars (i.e., blocks of mineral deposit left to support spaces necessary for a healthy and safe working environment) to develop prevention guidelines. **NIOSH**
- Funded the state-based Fatality Assessment and Control Evaluation (FACE) Program, which formulates prevention strategies for work situations with a high risk of fatality. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted West Virginia in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## CDC's Public Health Partnership with Wisconsin

- Provided funds to improve timeliness of reporting of birth defects, improve access to care for children with birth defects, develop activities to prevent spina bifida and anencephaly, and encourage surveillance for pre-natally diagnosed birth defects. **NCBDDD**
- Funded development of a system to identify children with fetal alcohol syndrome (FAS) that uses multiple sources to provide more accurate prevalence data; funds for case management and health-care provider education were included also. **NCBDDD**
- Provided funds and program development consultation for Wisconsin to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Funded the Wisconsin Department of Public Instruction in support of school health programs to reduce chronic disease risk factors (e.g., tobacco use, sub-standard eating habits, physical activity, and obesity). **NCCDPHP**
- Collaborated with the University of Wisconsin on a study of age-related hearing loss by analyzing >700 samples for levels of cotinine, a breakdown product of nicotine. **NCEH**
- Funded cities in Wisconsin to build environmental public health capacity in state and local departments of public health. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided funding for designing, implementing, and evaluating interventions for syphilis elimination, including community-developed plans, enhanced surveillance and outbreak response, delivery of behavioral and medical interventions, and assessment of prevention and control services. **NCHSTP**
- Assisted the Wisconsin Department of Health and Family Services in an investigation of a cluster of three wild-game-feast participants with rare neurologic diseases. **NCID**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Wisconsin's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Funded an injury control and research center at the Medical College of Wisconsin for addressing the burden of injury in the Great Lakes Region of the Midwest. **NCIPC**
- Funded the Wisconsin Department of Health and Family Services for development, implementation, and evaluation of core programs to build state capacity for injury prevention. **NCIPC**
- Funded the National Children's Center for Rural and Agricultural Health and Safety for providing guidance, technical assistance, and training related to childhood injury prevention. **NIOSH**
- Funded statewide development and implementation of a new model for youth injury surveillance, which will be linked with the state's youth work-permit system to determine whether youths who have obtained work permits are less likely to experience work-related injuries. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Wisconsin in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Provided funding and worked with the Mid-America Regional Public Health Leadership Institute at the Medical College of Wisconsin to develop managerial and leadership competencies of officials and others whose work intersects that of public health. **PHPPPO**

## CDC's Public Health Partnership with Wyoming

- Funded development of a program for tracking children who screen positive for hearing loss to evaluate 1) if follow-up diagnostic services are provided, 2) if children are enrolled in early intervention services, and 3) the effect of those services on the health and development of those children. **NCBDDD**
- Provided funds and program development consultation for Wyoming to operate its diabetes prevention and control program, which works to improve the quality of diabetes care, prevent or delay serious diabetes-related complications, and demonstrate that preventive care practices (e.g., foot and eye exams) are increasing. **NCCDPHP**
- Funded implementation of Wyoming's tobacco-use prevention and control program. **NCCDPHP**
- Funded Wyoming's public health laboratory as part of the six-state Rocky Mountain Consortium, which also includes Arizona, Colorado, Montana, New Mexico, and Utah, to build capacity for conducting a state biomonitoring program. **NCEH**
- Funded cooperative agreements with state and local health departments to provide childhood lead poisoning-elimination plans, surveillance systems, and strategic partnerships to prevent childhood exposure to lead hazards (primary prevention), to screen children at high risk (secondary prevention), and to refer those identified with elevated blood lead levels for services. **NCEH**
- Provided financial and technical assistance for human immunodeficiency virus (HIV) prevention, sexually transmitted disease (STD) prevention, and tuberculosis (TB)-elimination programs through state and local public health departments and community-based organizations. **NCHSTP**
- Provided voluntary laboratory performance evaluation programs for HIV and multidrug-resistant TB testing. **NCHSTP**
- Provided financial and technical assistance through the Epidemiology and Laboratory Capacity (ELC) program to strengthen public health surveillance and response to infectious diseases; also provided assistance in improving Wyoming's terrorism preparedness and response capacity through enhanced epidemiology and surveillance, smallpox-response planning, laboratory capacity for biologic and chemical agents, communications, and terrorism-response training. **NCID**
- Consulted with Wyoming State Department of Agriculture and Department of Health, State Parks Department, regarding recommendations for new regulations for using thermal hot springs and prevention of recreation-associated waterborne illnesses. **NCID**
- Funded the state-based Adult Blood Lead Epidemiology and Surveillance Program (ABLES) for tracking and responding to cases of excessive lead exposure. **NIOSH**
- Funded the University of Wyoming for development of guidelines for lifting an object from an inclined floor surface to reduce the risk of low-back pain and injury at the workplace. **NIOSH**
- Provided technical and financial support to improve vaccination coverage through provider-based assessment, feedback, incentive, and exchange (AFIX) activities, to help private-sector vaccination providers improve their performance, if necessary. **NIP**
- Assisted Wyoming in more effectively assessing immunization coverage among children entering kindergarten and first grade. **NIP**
- Supported the Health Alert Network, a joint local, state, and federal initiative to build a nationwide network of public health agencies to protect the United States against terrorism and other health threats. **PHPPPO**

## **Tables and Maps**

CDC and other agencies under the U.S. Department of Health and Human Services use multiple data sources to plan and operate public health programs that are designed to deliver services to those with the greatest health needs. The following tables and maps illustrate leading health indicators and the disparities among states and races/ethnicities.

## Years of Potential Life Lost (YPLL) Before Age 75 Years by Race and Ethnicity — 1998–2000

	White non-Hispanic	Black non-Hispanic	American Indian/ Alaska Native	Asian/ Pacific Islanders	Hispanic	All races
<b>United States</b>	<b>6,961</b>	<b>13,424</b>	<b>8,162</b>	<b>3,847</b>	<b>6,079</b>	<b>7,615</b>
Alabama	8,665	14,396	4,088	3,061	3,668	9,977
